

looks like clear is
creating greenhouse
effect compared to
dark

13:57:30 - 13:40:50

Synoptic - monthly sampling				Event: 2023 summer (month June)				General Notes/Observations:				
Measurement: Macrophyte Fluxes [CH4] and [CO2]				Instrument:								
Collection Date: 10/10/2023				Personnel: Foush & Emma								
Site	Zone	Collar ID	light/dark	Start Time	End Time	[CO2]in	[CH4]in	[CO2]fin	[CH4]fin	CO2 (ppm/s)	CH4 (ppb/s)	Notes / weather ppm
Crane Creek	wetland	MAC A	dark	12:49:16	12:52:30					0.070	0.011	CH4 T = 602 T, dead
Crane Creek	wetland	MAC A	light	13:00:00	13:04:10					0.099	0.012	same time as CO2 macrophytes
Crane Creek	wetland	MAC B	light	13:15:00	13:20:00					0.010	0.244	if 13:17:25-13:20:00 slope -0.017
Crane Creek	wetland	MAC B	dark	13:23:00	13:29:10					0.070	0.111	
Crane Creek	wetland	MAC C	light	13:37:25	13:38:00					-0.094	0.023	after 13:38:20, cloud impacted
