

Synoptic CB: Porewater Sulfide

May 2023 Samples

2025-12-16

Run Information

```
###things that need to be changed
Date_Run = "202305"
plates<- c("Plate1","Plate2","Plate3","Plate4","Plate5","Plate6","Plate7")
file_name<-"202305_allplates"
Month = "May"
Year = "2023"
yearmonth = "202305"
Run_by = "Stephanie Wilson" #Instrument user
Script_run_by = "Zoe Read" #Code user
Project = "COMPASS"

Run_notes="Plate 3 MC 10 and 20 were bad.
1/7 plates had a bad dup.
4/7 plates had a bad spike.
"#any notes from run

#Stds that should be excluded
# stds_to_remove<-data.frame(Plate=c("Plate3"),IDs=c("Std 3"))
stds_to_remove<-NA

##Data Entered Incorrectly
Old_ID_1 = "SHW_UPCON_LysB_45cm"
New_ID_1 = "SWH_UPCON_LysB_45cm"
```

#Note from Steph: Check all sample IDs from MSM Upland in 2023 May samples. Samples were labeled LysA, but are actually LysC from this month and zone only and need documented. If there are samples from MSM UP LysA 10cm listed, then the samples were NOT corrected and that would mean that all of the LysA samples should be LysC and we should document and correct. We know this because we hardly ever get water from LysA 10cm at MSM. This is a one time issue from May 2023 as far as I am aware.

```
## [1] "The string 'MSM_UP_LysA_10cm' was not found in the dataframe."
```

STD Curves

Checking STD Data against QAQC file

Table 1: Best std curve to use:

Date	Project	R2	Slope	Intercept	Top_STD	Plate
202305	COMPASS	0.9906303	0.0143206	0.0906597	100	Plate6

Matrix Check QAQC

Sample triplicate means and sd dev before bad reps removed

Sample triplicate means and sd dev after bad reps removed

Check the dups for QAQC

```
## [1] ">60% of Duplicates are within <10%"
```

Check the spks for QAQC

```
## [1] "<60% of Spikes are out of range - REASSESS"
```

Check to see if samples run match metadata & merge info

```
## ***All sample IDs are present in metadata.***
```
